AHMET EMRE CEPOGLU

Systems and Full-Stack Engineer

07481439637

10+ years of experience designing and building data intensive systems with international teams.

I enjoy functional programming, systems design, systems & tools development, working in the entire stack, math, patterns and teaching.

I am also interested in sustainability efforts, fighting games, squash, tea and gardening.

SR SOFTWARE ENGINEER AT ARUP

2022 - now

NodeJS React
Kafka AWS
Kubernetes ElasticSearch
PgSQL graph DBs

Raised the skillset of mostly Jr staff by organising mentoring sessions and balanced (with difficulty!) development responsibilities with my team's demands for me.

Identified, planned and solved tech debts: I aligned error-handling with best practices, introduced TypeScript. Generalised async communications and React components.

Improved test reliability: Paralellised tests and shortened automated tests runtime from 2hr to 10'. Made tests explicit and simplified assertions to remove false negatives by 91%.

Designed systems for managing data and saved 40k\$/mo by

SR DATA ENGINEER AT SOOSTONE

2021 - 2022

Haskell Python NodeJS React PgSQL Nix Planned and executed an iterative take-over of NodeJS microservices by Haskell monolith. Led a team to develop event-sourcing pipelines and improved relevance of content suggestion: sourced data from across the system to establish a user and content insight.

Identified costly manual processes and automated them with CLIs and e2e tests: Replaced a 1 day/week manual job with a script. Improved D

SOFTWARE ENGINEER AT ESEN S. I.

2012 - 2020

Al big data Scala NodeJS AngularJS Python Rails MQTT RabbitMQ Mongo Solr Built 2 telemedicine products; earning the company 150k\$/mo and providing the only income revenue for a company of 20.

Co-lead to prototype and build a big-data analytics system used by multiple countries: Grew my team from 1 to 13 and earned the company 1.5M\$ and opening a multi-M\$/year revenue channel. Met stakeholders to plan and deliver features.

Developed and implemented computer-vision algorithms.

Learned and taught new technologies, getting them adopted across the company: Pioneered CI, CD, containerisation paradigms. Gave workshops on Docker, CI, automated-testing, functional-programming.

TECH LEAD AT DIGITAL STRATEGIES

2015 - 2016

lead outreach NodeJS Led a team of 5+ doing full-stack development, making an online videoeditor.

Gave seminars and managed priorities to meet launch goals

CO-FOUNDER & MANAGER AT TEAM FROM BEYOND

lead Unity Recruited, sponsored and managed programmers, modellers, animators, game-dev ΑI voice actors, concept artists to create a 3d game. Implemented a multi-

agent responsibility-sharing creature Al.

BIPOSTA

APL BQN E-mail client built from scratch, for rapid consumption of e-mails so your Unix inbox doesn't grow to 4208 unread emails... again.

TWITCHY-POISON

0TP Streaming suite for twitch.tv featuring everything you need and more: a Elixir Websockets TUI chat app, task manager that takes you to a state of flow, work-out planner, ffmpeg integrations w/ your favourite text editor, a chat bot...

UNIFIEDJS/UNIFIED-LANGUAGE-SERVER

JS GitHub Language server for prose; using unifiedJS ecosystem. sponsorship Authored it and donated it to the UnifiedJS organisation.

OTHER PROJECTS

Elixir game-dev multiplayer	distributed computing Unity C#	DORT A high-paced multiplayer backgammon-like clash-of-clans-like game. Features cross-platform ranked matchmaking and a rollback-like netcode.
OCaml	Elm	WHY DVORAK Visualises arguments for why Dvorak is a more efficient keyboard layout. Created an Elm-like frontend framework.
OCaml	НТМХ	PORTOPHILE Full-stack web app to parametrically generate portfolios.
C Al Lua	SDL2 game-dev	AEC'S YZ-01 Built a top-down game engine that's scriptable with Lua. Bulit a game on top of it to demo my AI models on.
JS Al	React	HEURISTICS DRIVEN TETRIS BOT Competed in (now dead) TheAlBattle.com competition with Al bots I wrote. Ranked top 10.

CORP ESCAPISM

Scheme Al Tcl

Collection of utilities I wrote to ease my interaction with systems I use at work. Creates tickets automatically from comments, logs timesheets,

assists in code reviews, reminds people to review my PRs...

KAMP-US/MONOREPO/SOZLUK

TS mentoring

GraphQL

Assisting Jr devs with systems design and feature development

CS MAJOR FROM BILKENT UNIVERSITY

Al ML Built an OCR for music sheets in my freshman year.

Created an automatic video tagger.
